## PROFESSIONAL SUMMARY

Full-stack Web Developer with 6+ years of expertise in responsive design and frontend development. Proven track record in backend integration, API development, and database design. Skilled in version control, code optimization, bug fixes, and user interface development. Experienced in full-stack development, testing and debugging, and performance optimization across modern frameworks.

## PROFESSIONAL EXPERIENCE

Senior Web Developer | Digital Solutions Agency | 2021-Present

- Developed responsive design implementations using HTML5, CSS3, and JavaScript
- Built robust backend integration systems with RESTful API development
- Optimized frontend performance through advanced code optimization and caching strategies
- Implemented comprehensive testing and debugging protocols across projects
- Led performance optimization initiatives improving page load times by 50%
- Managed version control using Git and GitHub for team collaboration
- Designed and implemented scalable database design schemas for applications
- Conducted user interface improvements based on usability research and feedback

Full-Stack Developer | Web Solutions Company | 2019-2021

- Created responsive design layouts for mobile and desktop platforms
- Implemented API development for third-party service integrations
- Performed code optimization to reduce technical debt and improve efficiency
- Fixed critical bugs in production environments and deployed hotfixes
- Managed database design and optimization for application performance
- Contributed to version control processes and participated in code reviews
- Improved user interface components for better user experience

Junior Web Developer | StartUp Hub | 2017-2019

- Supported frontend development with HTML, CSS, and JavaScript
- Assisted in backend integration and API development tasks
- Participated in bug fixes and testing and debugging activities
- Learned responsive design principles and mobile-first implementation

## TECHNICAL SKILLS

Responsive design, Frontend development, Backend integration, API development, Database design, Version control, Code optimization, Bug fixes, User interface, Full-stack development, Testing and debugging, Performance optimization, JavaScript, React, Node.js, Express.js, MongoDB, REST APIs, Git, HTML5, CSS3, Agile development, Web accessibility, AWS

## CERTIFICATIONS & EDUCATION

Full-Stack Web Development Bootcamp Certificate

AWS Certified Cloud Practitioner

Bachelor of Science in Computer Science | Tech University | 2017
